

Industrial Revolution Machines

Over the next series of classes we will be covering the Industrial Revolution that started in England and moved across the world. None of this would have been possible without the creation of new machines.

Some of them had some strange names and they were simply made however they all served a specific purpose.

Without using Wikipedia, research the names of the famous machines listed below. Save this work in your notes as we will be discussing the importance of these machines during the next week's classes. The list is on the back of this page.

You can work with a partner but stay quiet!

For each find the following:

- **A picture of what it looked like to add to your text below**
- **Who invented the machine and when?**
- **What was it used for, what did it produce?**
- **What was it made of?**
- **Why was this new invention important in its time?**

Suggested sites but you are not limited to using all of them, a good place to start.

Finally a trivia question:

What bird was a coal-miners best friend?

Answer: See below

<https://www.youtube.com/watch?v=W0eQvZEWBrU>

Just in case it does not make any sense, put your earbuds on and watch this!

<https://www.youtube.com/watch?v=lqDIXUrpOAU>

Now you will remember!

List of Inventions

Flying Shuttle

Spinning Jenny

Water Frame

Power Loom

Jacquard Loom

Steam Engine

Steam Locomotive

Telegraph

Cotton Gin

Steamboat
