

World Regions Assignment

As part of the curriculum you are required to be able to identify and locate several world regions. To complete this part of the learning process you have to use map skills.

To complete this requirement you will have six weekly homework assignments. Each one will be graded as to accuracy and timely submission and will be a major part of your semester grade. You will be required to submit one assignment a week for a six-week period. It will be due on the first day of the week, usually Monday except for holidays. You will be reminded in advance that each assignment is due.

Instructions: Download the attached assignment.

For each assignment, numbers 1 to 6, fill in the regions/areas under each assignment number. Once this part is completed, answer the key question(s) that are asked at the bottom of the page. Research your answers for both sections so that you answer each assignment correctly.

You can ink, color, shade, highlight etc. on the maps but please do not use a regular pencil as it may erase easily.

Each weekly assignment will be graded (10% of the semester grade) and returned so that you can keep them in your notes.

Please make sure your assignments are legible. Any that cannot be read or identified will be returned and not graded! No credit will be given if messy!

Make sure that your name is on each assignment!

[No Name = No Grade]

World Regions Assignment

Name: _____

Assignment 1

North America

South America

Africa

Oceania

Europe

Africa

Ural Mountains

Atlantic Ocean

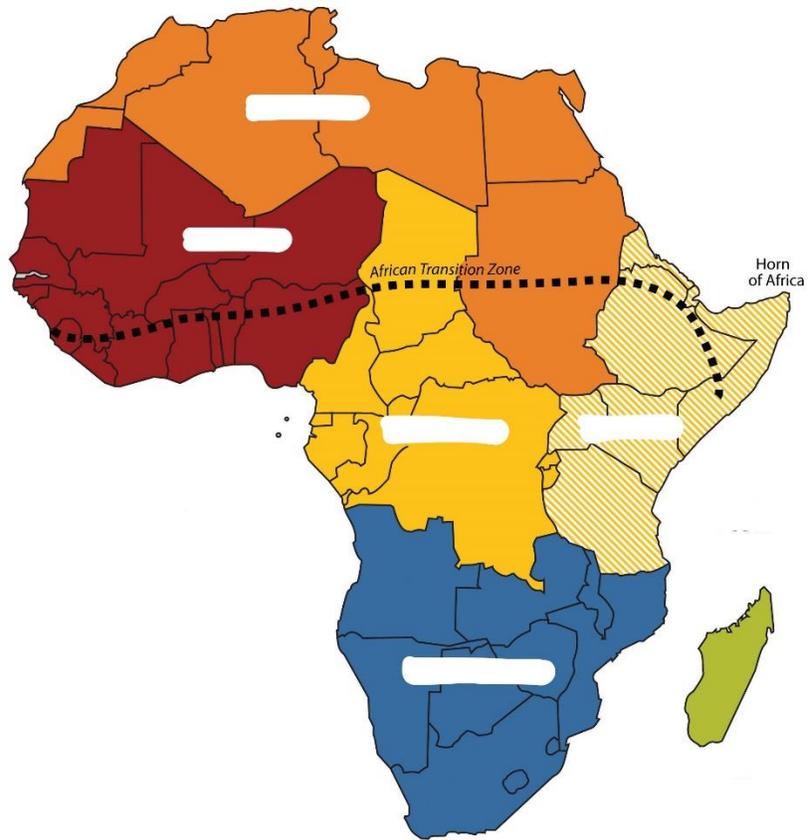

Pacific Ocean

Indian Ocean

Key Question: Why are the Ural Mountains essential to be marked on this map?
